

Anti-Theft Mobile Tracker

NAME : BANOTHU RAJ KUMAR

ROLL NUMBER : 14111007

Motivation

- ▶ Smartphone has become a significant part of our everyday lives. It contains your emails, contacts, photos, financial details and more, so having it stolen can be extremely distressing.
- ▶ Wanted to create a most complete anti-theft that would help you find and track your lost or stolen phone.

Introduction

- ▶ Anti- Theft Mobile tracker App tracks your mobile device using GPS System as well as your mobile-networks default tracking system.
- ▶ It not only tracks your mobile, but also comes with lots of other features that allows you to quickly locate, protect and recover your lost/ stolen mobile phone.

Features

- ▶ **Uninstall Protection:**

- ▶ No one can uninstall the application.

- ▶ **Incoming Call Alert:**

- ▶ App will send message to preregistered mobile numbers whenever your stolen/lost mobile gets an incoming call.

- ▶ **Anti Theft Alarm:**

- ▶ We can set alarm on the lost mobile by sending predefined alarm on-message from the registered mobile numbers

Features...

▶ **Incoming Message Alert:**

- ▶ If your mobile gets message from any other number, then application automatically sends message to the registered mobile numbers with the sender number, date and time - details.

▶ **Lock Mobile with an SMS:**

- ▶ With this app, your mobile is immediately locked upon receiving the predefined template message from the pre-registered mobile numbers.

▶ **Outgoing Call Alert:**

- ▶ Whenever your stolen/lost mobile makes an outgoing call, a message is sent to the preregistered numbers.

Features...

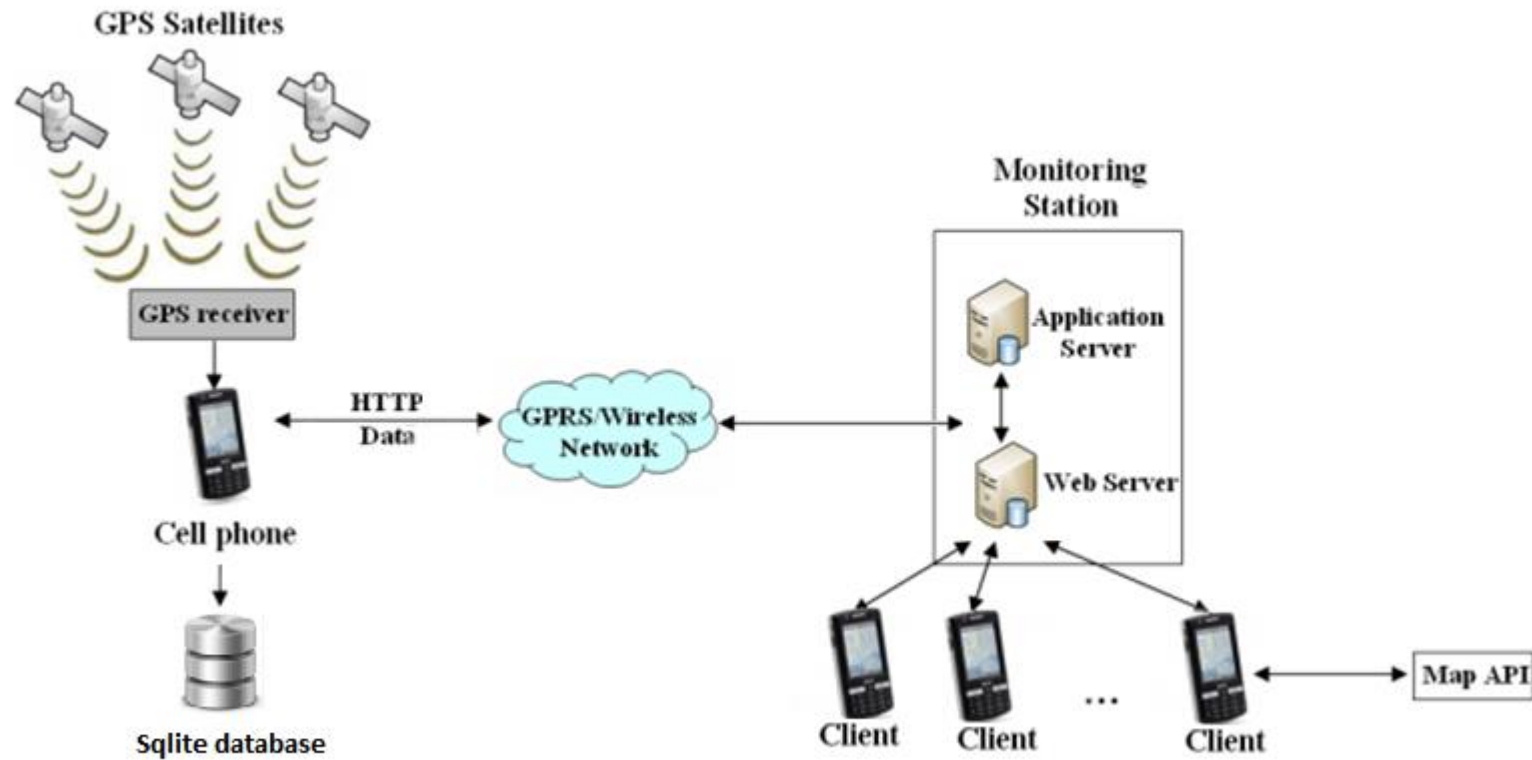

- ▶ **Track your mobile on Google Maps:**

- ▶ You can also track the location of your lost mobile on Google Maps.
- ▶ When SIM on your phone is changed, the location is automatically shared with the server.

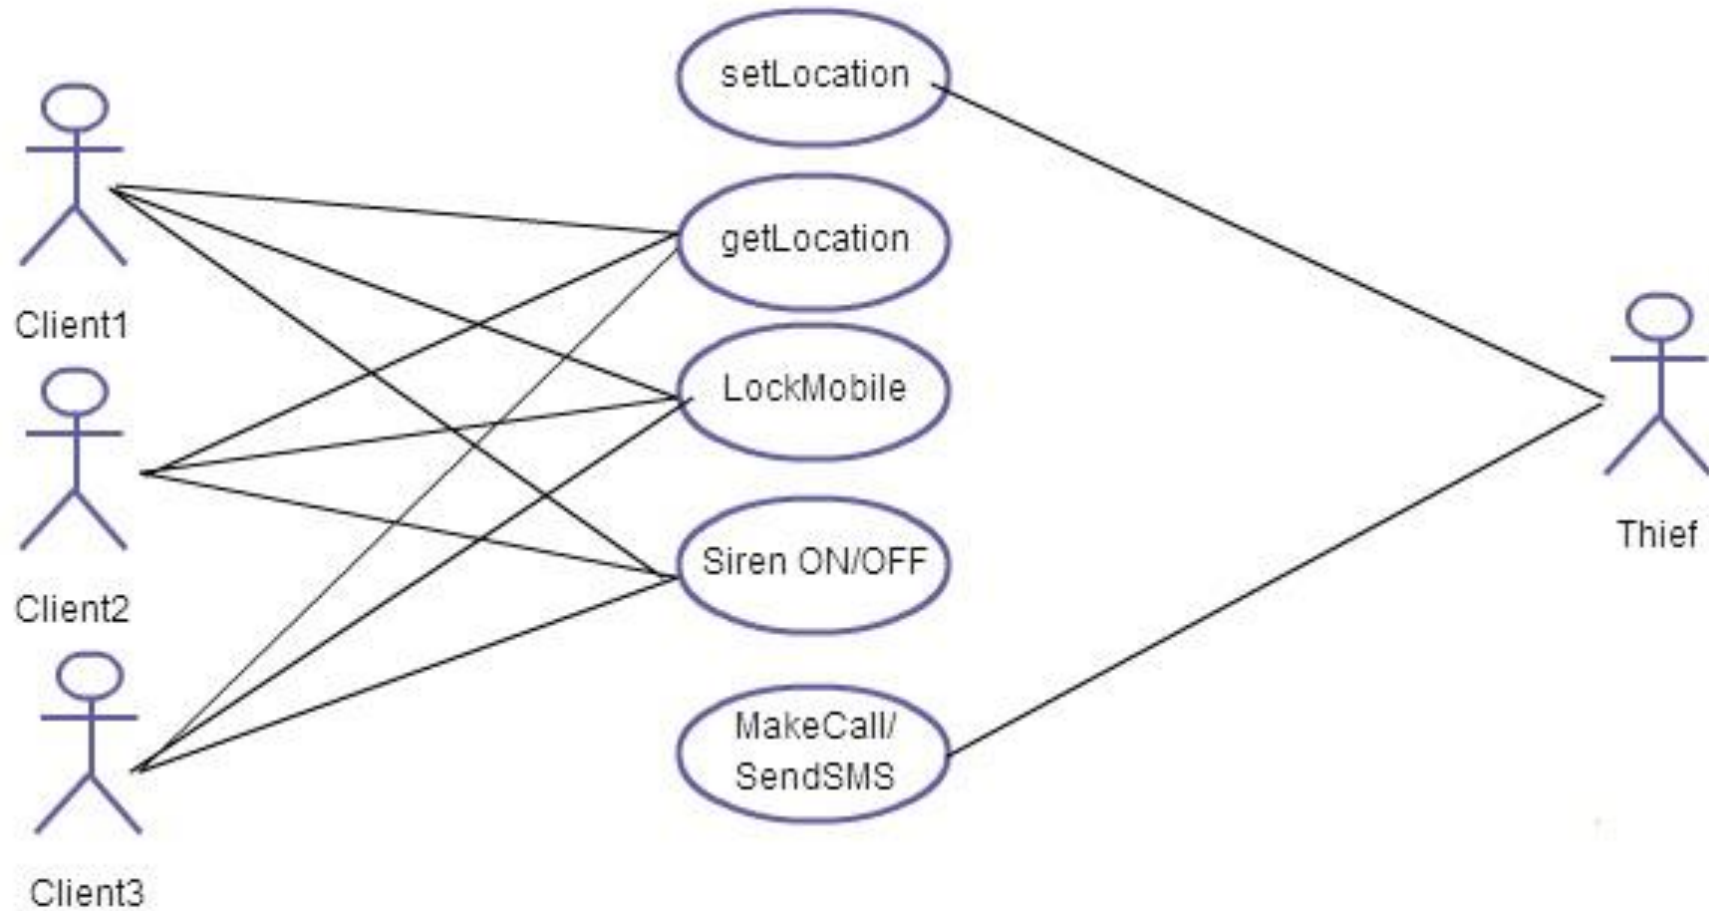

Technologies Used.

- ▶ JSP/ Servlets
- ▶ Android
- ▶ Google maps
